

## User Stories

As someone who's trying to improve and expand our cooking skills, we want to design and implement a blog where we can upload new recipes that we try.

As users, the blog allows them to:

- View a list of all recipes and be able to filter
- View a page of chefs' favorites
- View chef biographies
- Sign up and login to use additional services:
- Like recipes which are added to a "My Recipes" page
- Be designated as a 'Writer'

As Writers, the blog allows them to:

- Add recipes
- Assign recipes to chefs' favorites
- Edit recipes
- View past recipes

As a recipe, each recipe:

- Is automatically added to the list of all recipes
- Are created by 'Writers'
- Can be added to the list of chefs' favorites
- Once selected, opens a new page that displays the full recipe + possible pictures (from pixabay)
- Contain "tags" that can help with filtering on the recipe page
- Can be liked by users and added to their My Recipes page
